WHEN “AWESOME” IS ISOLATING MAKING HACKATHONS ACCESSIBLE

DAN@ADICU.COM | ADICU.COM | DEVFE.ST

WE ARE

THE APPLICATION DEVELOPMENT INITIATIVE

WE RUN

A WEEK LONG DEVELOPMENT EVENT

DEVFEST

— HOSTED BY ADI —

DEVFEST IS
NOT
A HACKATHON

DEVFEST IS
NOT
ADI'S MOST IMPORTANT EVENT

COOKIES & CODE
IS

DEVFEST IS ABOUT
EDUCATION

DEVFEST IS ABOUT
COMMUNITY

DEVFEST IS ABOUT
BUILDING

REAL LEARNING AT A HACKATHON

CAN IT BE DONE?

An Accelerated Introduction to Web Development

Building a webapp in Flask.

Written and developed by [Dan Schlosser](#) and [ADI](#).

About This Document

[Top](#)

Methodology

For the purposes of learning to make a web application using [Flask](#), we will write an entire web application, taking time to dissect how each piece functions and fits. Each section is intended to be modular, but working in order is recommended.

This document teaches the CSS and HTML programming languages, as well as the Flask Python library.

Prerequisites

Basic knowledge of the Python programming language is suggested. If you don't already know Python, checkout [this ADI-developed tutorial](#). No knowledge of HTML, CSS or Flask is expected or required.

The End Product

We will be building a web application throughout this series, called "Has it Been Made Yet?". It should let users type in a few keywords for a hackathon idea, and then it will tell them whether or not someone has made that idea and hosted it on [GitHub](#). GitHub is a social network for [open-source](#) code, and is the most popular place for programmers to host their projects (and therefore, a great place to check for our app).

HackCon Talks Schedule [Prel... dan.r.schlosser@gmail.com

File Edit View Insert Help Comment only Comments Share

100%

Note: all talks and topics are followed by a Q&A / discussion.

This schedule is tentative. If you're tagged in a comment, please respond to the comment to confirm that you can make it and are good to give this talk.

Speaking Guidelines: Your talk is 5 minutes long (followed by Q&A unless you hear otherwise :).

If there's a great talk opportunity that is missing here, email alexey@alexeymk.com and let him know!

Saturday, Feb 1st
At **Alley NYC** (500 7th Avenue, 17th floor)

930 Breakfast

1000 Kick-off and introductions

1030 Topic: A brief history of hackathons
Jonathan Gottfried, Twilio Evangelist

1100 Getting Newbies Attending and Productive
Lightning talks followed by discussion

- Dan Schlosser from ADICU (Columbia)
- Clara Wu from PennApps
- Molly Long from Brown
- Dennis Li from Duke

1200 Topic: Hackathon Management
Lightning talks on past approaches

- Bryan Clavnoole from PennApps on Logistics & Crisis Management

"I'm not smart enough to go..."

- SOPHOMORE / CS MAJOR @ COLUMBIA

RANKINGS

The screenshot shows the Major League Hacking (MLH) website's ranking page. The top navigation bar includes links for Schedule, News, and About. The main content area displays a table of university rankings. The table has three columns: Attendance Points and Merit Points. The top row shows Maryland at 1st place with a red robot icon. The bottom row shows Carnegie Mellon University at 3rd place with an orange dog icon. The table lists the following universities:

	Attendance Points	Merit Points
University of Maryland	320	666.66
University of New Jersey, The State University of New Jersey	217	661.66
Carnegie Mellon University	128	625
Massachusetts Institute of Technology	56	442.5
Columbia University	92	300
University of Michigan	99	200
Harvard University	20	200

HACKATHONS ARE INTIMIDATING

"HACKTHON CULTURE"

RANKINGS

The screenshot shows the MLH website's ranking section. At the top, there's a navigation bar with 'Schedule', 'MLH MAJOR LEAGUE HACKING', 'News', and 'About'. Below the navigation is a large red circle containing a white robot icon. To the right of the icon, the text 'Maryland' is displayed above '1ST'. To the right of Maryland, another red circle contains a white coffee cup icon, with 'Carnegie' partially visible below it. The word '3RD' is also visible. Below these sections is a table with columns for 'Attendance Points' and 'Merit Points'. The table lists several universities:

	Attendance Points	Merit Points
University of Maryland	320	666.66
University of New Jersey, The State University of New Jersey	217	661.66
Carrie Mellon University	128	625
Massachusetts Institute of Technology	56	442.5
Columbia University	92	300
University of Michigan	99	200
Harvard University	20	200

JayTee52 (Connection reset by peer))
yes, it's the price we pay for not using
the oss drivers
erm, nvidia-glx?
no
* reiki has quit (Remote closed the
connection)
JayTee52 that's 8776. I'm running 9746 which
allows me to actually use the
nvidia-settings applet instead of
wasting time editing xorg.conf to get my
widescreen monitor working right.
pmj no, what I meant was that nvidia-glx is
the hassle-free alternative
I disagree
pmj and infinitely better for almost anyone
that asks the question
* reiki (n=yardbird@74-37-237-138.dsl1.hol.

#ubuntuforums
reiki OUCH! ...
reiki dayum
pmj if they have to ask, they're better off
not using the Envy script or anything

JayTee52 if you have a standard 17" LCD with
1024x768 resolution it's ok but if you
have a better monitor nvidia-glx sucks.
don't run in terminal, huh? :)
reiki right, nobody say anything they don't
want posted on wikipedia!
Moniker42 wikipedia sucks!
